

EAST Search Results Case No. 10/643,280

US 5673097 A	DERWENT	Portable scanning laser ophthalmoscope - includes housing which contains source of laser light which is scanned, by battery powered scanning system, for generating two-dimensional area of illumination	
US 7159984 B2	USPAT	Subjective optometric apparatus	351/227
US 5903336 A	USPAT	Eye examining apparatus having a driver for driving an eye examining system	351/245
US 4457461 A	USPAT	Head mounting apparatus	224/181
US 20020003608 A1	US-PGPUB	Ophthalmic examination apparatus	351/245
US 20030017810 A1	US-PGPUB	ROTATIONAL MECHANISM FOR A WIRELESS COMMUNICATION DEVICE	455/575.1
US 6364484 B2	USPAT	Ophthalmic examination apparatus	351/200
WO 2004017826 A	DERWENT	Headrest for ophthalmic instrument, has detection element such as magnet, light emitting diode and optical filter, integrated with attachment plate formed with circular central aperture	
US 6260968 B1	USPAT	Pupilometer with pupil irregularity detection capability	351/205
US 6116736 A	USPAT	Pupilometer with pupil irregularity detection capability	351/206
US 20040184002 A1	US-PGPUB	Intelligent patient interface for ophthalmic instruments	351/245
US 6768899 B2	USPAT	Rotational mechanism for a wireless communication device	455/90.3
WO 2004017826 A1	EPO	INTELLIGENT PATIENT INTERFACE FOR OPHTHALMIC INSTRUMENTS	
US 5841502 A	USPAT	Ophthalmic apparatus	351/209
